Parity monitoring ensures that the wrong code table is not accessed even in the event of a wire break.

Benefits

- Reduction of type variations, as up to 8 different output codes can be integrated into one absolute encoder.
- One single Absolute Encoder replaces up to 8 absolute encoders with different output codes.
- Reduced stocking

Features

- Super- high resolution with up to 4096 steps per revolution
- Code disk scanned by a highly integrated optical ASIC
- 8 code tables stored in EPROM
- Up to 12 overload- protected outputs
- Code tables created by the customer can be used for absolute encoders of the PWF- PC series, with up to 12 outputs.

Applications

Measurement of absolute position in various machines and systems such as wind power and solar plants, material handling equipment, textile machines, packaging plants, rollers, port facilities, printing machine
